Original-voltage result and optimistic 1.8 V bound
Direct ERV to O30 — original voltage (primary)
Direct ERV to O30 — 1.8 V ceiling (upper bound)
Direct ERV full duty — original voltage (primary)
Direct ERV full duty — 1.8 V ceiling (upper bound)
Retained EO displacement vs steady reference [%]
Operating horizon [h]
Both electrical boundaries give finite inventory
Cumulative water / original target rate [h]
Operating horizon [h]
